

MEET YOUR FIRE TV CUBE

**Important: High-speed HDMI cable is not included in box.*

Also included: remote, power adaptor, AAA batteries

POSITION YOUR FIRE TV CUBE

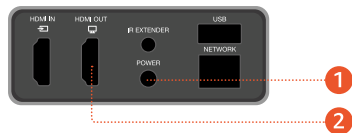

PLACE FIRE TV CUBE 30-60 CM AWAY FROM ANY SPEAKERS, with the ports facing away from you.

IT SHOULD NOT BE PLACED IN A CLOSED CABINET. Fire TV Cube needs to hear your commands.

To control components that are in a closed cabinet, use an IR extender (sold separately).

CONNECT YOUR FIRE TV CUBE

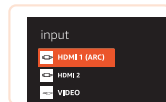

1 PLUG IN POWER CABLE

Connect the included power adaptor to Fire TV Cube and plug it into an outlet-socket.

2 CONNECT THE HDMI CABLE

Use a high-speed HDMI cable (not included) to connect the HDMI OUT port on the Fire TV Cube to HDMI port on your TV.

3 SELECT INPUT FOR TV

Turn on your TV, then select the input on your TV that matches the name of the HDMI port you are connected to.

TIP: Using the included remote control, go to the Settings menu in Fire TV Cube, and select your network from the list displayed. If your network is hidden, enter your network name.

TIP: If you see a lock icon, your Wi-Fi network requires a password, so make sure you have it available. This password is not your Amazon account password.
